

EXOWRAP® INSULATION SYSTEM

MEETS SOLAS REGULATION II-2/15.2.10 (FIRE PROTECTION IN CASE OF FUEL OIL SYSTEM FAILURE)

MEETS IMO RESOLUTION MSC.61 (67) ADOPTION OF THE INTERNATIONAL CODE FOR THE APPLICATION OF FIRE TEST PROCEDURES

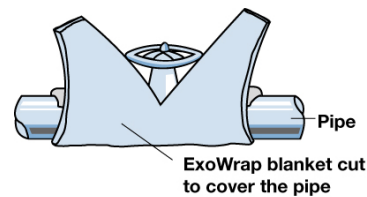

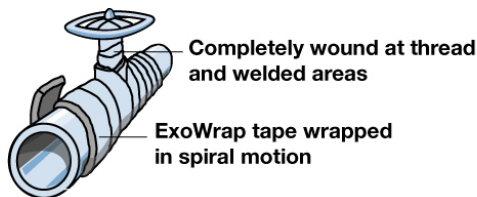

ExoWrap® Insulation System, the one-step insulation system, is the quick and easy way to insulate high temperature surfaces in vessel engine rooms. **ExoWrap® Insulation System** is a revolutionary system made from bio-soluble vitreous silicate fibre which is reinforced with an outer jacket of heat sealed aluminum foil. In tape or blanket format, **ExoWrap® Insulation System** can be easily removed and reinstalled by using the **ExoWrap® Silihesive Tape** and is rated for use to 1,000°C max. **ExoWrap® Insulation System** can be used throughout the engine room.

TYPICAL MARINE APPLICATIONS

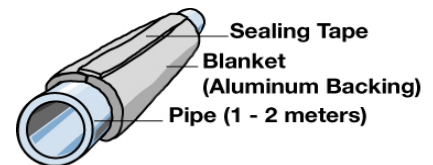

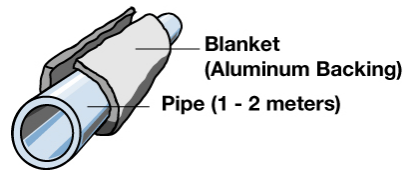

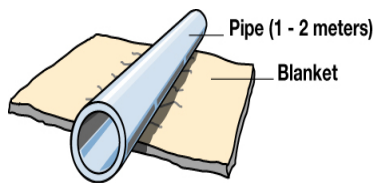

- Steam Lines And Valves
- Steam Turbines
- Exhaust Trunking
- Turbochargers
- Heat Exchangers
- Fuel Oil Piping

HOW TO USE

ExoWrap® Tape - Use on bent and flanged pipes in areas where maintenance is not a consideration and/or space is limited. **ExoWrap® Tape** has a pressure sensitive adhesive on the inner side for ease of installation.

ExoWrap® Blanket – Use on straight pipes, valves, exhaust equipment, turbochargers, angled and uneven surfaces and anywhere that insulation is required. **ExoWrap® Blankets** are secured with **ExoWrap® Silihesive Tape** for ease of maintenance.

PACKAGING TAPES & BLANKETS

WIDTH	THICKNESS	LENGTH	ROLLS/BOX	PRODUCT CODE
50 mm (2")	3 mm (1/8")	7.7 m (25')	24	A06-XW050-024
100 mm (4")	12 mm (1/2")	3.3 m (10')	6	A06-XW100-006
300 mm (12")	25 mm (1")	7.7 m (25')	2	A06-XW300-002
600 mm (24")	25 mm (1")	7.7 m (25')	1	A06-XW600-001
Silihesive Tape			27	A06-XWSIL-027
